

SINN7

DasMic.1 USB

221395

The Sinn7 DasMic.1 USB is a membrane condenser microphone that features an integrated USB interface with a microphone amplifier. This way, with the help of supplied USB cord, it is possible to connect the DasMic.1 USB directly to a PC or Mac. No further cable, interface or mains adapter is necessary thus knowing the true promise of a condenser microphone. Furthermore the installation of drivers is unnecessary - after connecting the USB microphone to the computer it will instantly be recognized by it. Professional recordings in studio quality - directly via USB!
