Made in China. Due to continuous product development, specifications and appearance are subject to change. © Copyright Lamba plc 2013. E&OE.

Thank you for purchasing this Kam product, we are sure that it will serve you for many years to come.

To optimise the performance of this product, please read these operating instructions carefully to familiarise yourself with the basic operations of this unit. Please retain them for future reference. This unit has been tested at the factory before being shipped to you.

To prevent or reduce the risk of electrical shock or fire, do not expose the unit to rain or moisture. To prevent a fire hazard, do not expose the unit to any naked flame sources. Unplug this apparatus during lightning storms or if it is unlikely to be used for long periods of time.

When installing the unit, please ensure you leave enough space around the unit for ventilation. Slots and openings in the unit are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered.

The unit is powered by mains electricity, always handle the power cable by the plug. Never pull out the plug by pulling on the cable. Never touch the power cable when your hands are wet as this could cause an electric shock. Do not tie a knot in the cable. The power cable should be placed such that it is not likely to be stepped on. A damaged power cable can cause a fire or give you an electrical shock. Check the power cord periodically, if you ever find that it is damaged, replace it before using the unit again. Contact your retailer for a replacement.

The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit is to be used meets the required written on the unit.

The lightning flash symbol inside a triangle is to alert the user to the presence high voltage within the unit's enclosure that may be of sufficient power to constitute a risk of electrical shock to persons.

Caution: to prevent the risk of electric shock, do not attempt to open the unit. No user-serviceable parts inside. Refer all servicing to qualified service personnel.

The exclamation mark inside a triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the appliance.

Select the installation location of your unit carefully. Avoid placing it in direct sunlight or locations subject to vibration and excessive dust. Do not use the unit where there are extremes in temperature (below 41°F / 5°C or exceeding 95°F / 35°C).

Unpacking and safety Please unpack your new product carefully. Your new product should reach you in perfect condition. Please check that no damage has occurred during transit. If any damage is found, do not operate your unit. Please contact the retailer you purchased it from immediately. If there is any damage to the mains cable do not use the device. Always disconnect the unit from the mains supply when carrying out any cleaning of the unit.

Manufacturer declarations

In compliance with the following requirements: **RoHS Directive (2002/95/EU)** and **WEEE Directive (2002/96/EU)**.

If this product is ever no longer functional please take it to a recycling plant for environmentally friendly disposal.

CE declaration of conformity

R&TTE Directive (1999/5/EU), EMC Directive (2004/108/EU), Low Voltage Directive (2006/95/EU).

The declarations are available on application from certification@lambapl.com

Before putting the devices into operation, please observe the respective country-specific regulations.

Installation

Unless it has already been assembled prior to shipping, attach the hanging bracket to the unit via the screw holes. Ensure that the unit is firmly fixed together to avoid vibration during operation. Make sure that the structure that you attach the light to is secure and able to support a weight of 10 times of the unit's own weight. Always use a safety cable that can hold 12 times of the weight of the unit when installing the fixture. The equipment must be fixed by professionals and must be attached in a position that is out of the reach of unqualified personal.

Cleaning

The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimise light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the unit's optics. Clean with soft cloth using normal glass cleaning fluid. Always dry the parts carefully.

Operation

There are four ways to operate this unit:

Auto mode

Sound activated (Sound-to-Light) mode

Via a universal DMX controller

Master/Slave mode / Standalone operation

FUNCTION SETTING

MENU UP DOWN ENTER

Auto mode and Sound activated (Sound-to-Light) mode

To operate the unit in either of the above modes, use the Function Setting buttons on the rear of the unit. Start by pressing the Menu button to select your desired effect from the table below e.g. A1 mode (Auto 1 red), then use the Up and Down buttons to select the speed of the effect 1-9 (slow to fast). Then press the Enter button to save your changes.

Manual setting mode:

A1 mode	Auto 1 setting (red)	Speed 1~9
A2 mode	Auto 2 setting (green)	Speed 1~9
A3 mode	Auto 3 setting (blue)	Speed 1~9
A4 mode	Auto 4 setting (amber)	Speed 1~9
A5 mode	Auto 5 setting (white)	Speed 1~9
A6 mode	Auto 6 setting	Speed 1~9
A7 mode	Auto 7 setting (flash)	Speed 1~9
A8 mode	Auto 8 setting (no flash)	Speed 1~9
S1 mode	Sound active 1 setting	Speed 1~9
S2 mode	Sound active 2 setting (flash)	Speed 1~9
S3 mode	Sound active 3 setting (no flash)	Speed 1~9
L mode	Under sound active condition, no music status light off, setting (L 0)	
	Under sound active condition, no music status light on, setting (L 1)	
d mode	DMX setting	

Universal DMX controller operation

When using a universal DMX controller to control a chain of units, you have to set the address using the DMX table below.

Master/Slave operation

Multiple units can be linked together in a daisy chain and operated in Master/Slave mode. Please use a 3 pin XLR cable/plug when connecting multiple units together in Master/Slave mode.

Master unit: select Auto or Sound mode on the Master unit.

Slave units: select DMX mode and set the start address to **d001**.

In Master/Slave mode please refer to the DMX settings using the table below.

DMX code setting: d001~d512

CH1	0~255	Red
CH2	0~255	Green
CH3	0~255	Blue
CH4	0~255	Amber
CH5	0~255	White
CH6	0~255	LED strobe
CH7	0~180	Manual rotation
	181~255	Auto rotation
CH8	11~200	Auto DMX
	201~255	Sound DMX

Technical specification & features

LED Rodeo

Multi lens classic derby lighting effect with DMX

Multi-colour RGBW LED effects

Extreme wide angle multi-beam lighting effects

Sound-to-Light mode via built-in microphone

Adjustable microphone sensitivity

Auto/standalone mode

DMX mode

Master/Slave mode

The unit can be operated by DMX512 control or can be used as an individual unit without controller

Four button function setting with LED display

Tough metal chassis

Adjustable metal hanging bracket

Safety chain loop

IEC mains input

Fan cooled operation

Voltage: AC110~240V / 50/60Hz

Power: 50w

LED: 5 x 3w LED (red, green, blue, white & amber)

Fuse: 3A

Control signal: DMX signal

Channels: 8 channels

Dimensions: 320 x 305 x 320mm

Weight: 2.9Kg
