Thank you for purchasing this Kam product, we are sure that it will serve you for many years to come.

To optimise the performance of this product, please read these operating instructions carefully to familiarise yourself with the basic operations of this unit. Please retain them for future reference. This unit has been tested at the factory before being shipped to you.

To prevent or reduce the risk of electrical shock or fire, do not expose the unit to rain or moisture. To prevent a fire hazard, do not expose the unit to any naked flame sources. Unplug this apparatus during lightning storms or if it is unlikely to be used for long periods of time.

When installing the unit, please ensure you leave enough space around the unit for ventilation. Slots and openings in the unit are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. To prevent fire hazard, the openings should never be blocked or covered.

The unit is powered by mains electricity, always handle the power cable by the plug. Never pull out the plug by pulling on the cable. Never touch the power cable when your hands are wet as this could cause an electric shock. Do not tie a knot in the cable. The power cable should be placed such that it is not likely to be stepped on. A damaged power cable can cause a fire or give you an electrical shock. Check the power cord periodically, if you ever find that it is damaged, replace it before using the unit again. Contact your retailer for a replacement.

The voltage of the available power supply differs according to country or region. Be sure that the power supply voltage of the area where this unit is to be used meets the required written on the unit.

The lightning flash symbol inside a triangle is to alert the user to the presence high voltage within the unit's enclosure that may be of sufficient power to constitute a risk of electrical shock to persons.

Caution: to prevent the risk of electric shock, do not attempt to open the unit. No user-serviceable parts inside. Refer all servicing to qualified service personnel.

The exclamation mark inside a triangle is intended to alert the user to the presence of important operating and maintenance instructions in the literature accompanying the appliance.

Select the installation location of your unit carefully. Avoid placing it in direct sunlight or locations subject to vibration and excessive dust. Do not use the unit where there are extremes in temperature (below 41°F / 5°C or exceeding 95°F / 35°C).

Unpacking and safety Please unpack your new product carefully. Your new product should reach you in perfect condition. Please check that no damage has occurred during transit. If any damage is found, do not operate your unit. Please contact the retailer you purchased it from immediately. If there is any damage to the mains cable do not use the device. Always disconnect the unit from the mains supply when carrying out any cleaning of the unit.

Manufacturer declarations

In compliance with the following requirements: **RoHS Directive (2002/95/EU)** and **WEEE Directive (2002/96/EU)**.

If this product is ever no longer functional please take it to a recycling plant for environmentally friendly disposal.

CE declaration of conformity

R&TTE Directive (1999/5/EU), EMC Directive (2004/108/EU), Low Voltage Directive (2006/95/EU).

The declarations are available on application from certification@lambapl.com

Before putting the devices into operation, please observe the respective country-specific regulations.

Installation

Unless it has already been assembled prior to shipping, attach the hanging bracket to the unit via the screw holes. Ensure that the unit is firmly fixed together to avoid vibration during operation. Make sure that the structure that you attach the light to is secure and able to support a weight of 10 times of the unit's own weight. Always use a safety cable that can hold 12 times of the weight of the unit when installing the fixture. The equipment must be fixed by professionals and must be attached in a position that is out of the reach of unqualified personnel.

Cleaning

The cleaning of internal and external optical lenses and/or mirrors must be carried out periodically to optimise light output. Cleaning frequency depends on the environment in which the fixture operates: damp, smoky or particularly dirty surrounding can cause greater accumulation of dirt on the unit's optics. Clean with soft cloth using normal glass cleaning fluid. Always dry the parts carefully.

Operation

This is an easy-to-use, Plug&Play product. There are two ways to operate this unit:

- A. Sound activated (Sound-to-Light)
- B. Auto mode

Simply attach the unit to a mains power supply and you are ready to go!

Use the switch on the rear of the unit to choose which mode you wish the unit to run in.

Auto mode

In Auto mode, the unit runs through a series of preset patterns.

Sound mode

In Sound mode, the units effects are activated by music or sound. This is also known as Sound-to-Light mode. The unit has a built-in microphone which 'listens' for any strong sound source (e.g. heavy bass in your music) and projects the lighting effects in time with the beat. To adjust the amount of lighting effect, simply turn the Mic Sensitivity knob on the rear of the unit in one direction, this will increase or reduce the amount of audio the unit 'listens' to.

Technical specification & features

Kam LED Minx

Classic disco moonflower effect

Multi-colour RGBW LED effects

Easy Plug&Play operation

Sound-to-Light mode via built-in microphone

Adjustable microphone sensitivity

Auto/standalone mode

Tough metal chassis

Adjustable metal hanging bracket

Safety chain loop

Voltage: AC220~240V / 50/60Hz

Power: 20w

Fuse: 1A

LED: 4 x 3w LED (red, green, blue & white)

Operating modes: 2

Dimensions (WxHxD): 110 x 125 x 230mm (not including bracket)

Weight: 1Kg
