KAM

# Moonbulb DUO

**Instructions for use.** Simply plug the Kam Moonbulb DUO into a standard light fitting (e.g table lamp, ceiling light) and turn ON the mains power. The first time you turn on the power, the Moonbulb DUO will light up white. Turn the power OFF and ON again (within 2 seconds) and the bulb will light up with moving multicolour disco effects. To go back to the white light, simply turn the bulb OFF and ON again.

You have been supplied with 2 adaptors; a BC (bayonet cap) adaptor and a SES (small Edison screw) adaptor. If your chosen light fitting doesn't fit the standard ES (Edison screw) fitting, screw the Moonbulb DUO into the correct adaptor and then insert this into your light fitting. **Always** turn the mains power off **before** inserting any light bulb.

*Voltage: AC 110-220V 50-60Hz / 4W Max | LEDs: 3 x 1W RGB + 10 x SMD chips*
