## ALU Sleeve CD-Case 200

221444

Jaytec's new Alu Sleeve CD Cases offer an intelligent and comfortable solution facilitating transportation of a CD collection and the next DJ gig. In this case removable double-CD sleeves are being led via a rail - this way a considerable bigger amount of CDs than in jewelcases can be stored; flipping through the CDs also becomes way more comfortable. Either two CCDs or one CD plus booklet can be accommodated per sleeve. Thanks to the sleeves' index cards and consecutive numbering, even in big cases, keeping the overview is always guaranteed.

### features

- CD case with removable double sleeves
- Rail construction facilitates flipping through CDs
