Compatible With Various Media and Music Formats **1**

5 Auto BPM LOCK

6 Create PLAYLIST Function

4 Auto Beat Loop Function

USB | MIDI | MP3 | COMPACT disc

FEATURES

1 Compatible With Various Media and Music Formats

Playback of MP3, AAC, WAV and AIFF files recorded on USB mass storage devices[1] and CD-R/RW discs as well as conventional music CDs. Adapting to today's variety of media formats, the CDJ-350 enables playback of MP3, AAC, WAV and AIFF audio files from CDs and USB memory devices. A USB port located on top of the turntable enables users to quickly connect an external storage device or a hard drive packed with music files, minimizing the need to bring a laptop computer to performances.

2 rekordbox™ Music Management Software

The CDJ-350 turntable includes rekordbox™, Pioneer's proprietary music management software that organizes and catalogs a DJ's entire music library. When music files are imported to rekordbox, the software analyzes each file and prepares them for use specifically with the CDJ turntable.

Included | rekordbox
Music Management Software | Manages music files and supports and easy DJ life.

3 BEAT Display Function

Visually illustrates the beat position of a song and the playback point providing easier hand, eye and ear coordination when performing scratches and loops.

4 Auto Beat Loop Function

With one press of a button on the player, the user can create various loop performances including:

- Beat Loop - Matches the beat and repeats a 4-beat loop
- Loop Divide - While playing a loop, plays the loop at a different rhythm
- Hot Loop - While playing a loop, returns to the start of the loop and plays it

5 Auto BPM LOCK

Users can set a Master beat per minute (BPM) on the CDJ-350 that current playing songs can be synchronized to with a touch of a button. This feature enables beginners to easily match the tempos of songs by simply adjusting the speed to the Master BPM on each player.

6 Create PLAYLIST Function

While a song is playing, users can immediately add it to a new playlist with a touch of a button for future playback of favorite songs.

7 DJ Software Compatible

The CDJ-350 is HID and MIDI compatible with other DJ software allowing it to be used as an audio interface. The HID controls were implemented into the player for superior interfacing with software, faster communication speed over MIDI, audio/visual streaming and two-way information on the display. HID enables easy, precise and native control of DVS systems without the need for time-coded discs.
