# DJM-900nexus CREATIVITY & CONTROL

Introducing the DJM-900nexus. The next generation mixer that delivers jaw-dropping studio quality effects, ultimate computer connectivity, high performance features and powerful sound.

# DJM-900nexus DIGITAL, DELIVERED

High fidelity sound card / Six stunning sound colour FX / Overhauled Beat Effects / rekordbox™ Quantize button / Touch sensitive X-PAD / TRAKTOR™ certified / PRO DJ Link functionality via LAN connection / DVS software control / Input switcher / 3-band EQ and 3-band isolator / Fully MIDI assignable

Built in touch sensitive X-PAD

Six stunning studio quality sound colour FX

The DJM-900nexus digital mixer embodies Pioneer's commitment to producing pro DJ equipment that offers the ultimate in connectivity, creativity and control. The next generation of our award-winning DJM series builds on the success of the past – but adds mind-blowing features to make it the mixer of the future.

The new arrival delivers the high quality, clear and powerful sound expected from Pioneer. The built-in four channel 96kHz/24-bit soundcard can simultaneously input and output all audio signals with no loss of sound quality. Audio circuitry is borrowed from the top-flight DJM-2000, with a 32-bit A/D converter to digitise and enhance sound quality, and a 32-bit DSP to suppress digital noise.

It's the six innovative studio-quality Sound Colour FX that will add an extra dimension to every DJ set. An overhauled Beat FX section, with five new FX, further enhances the potential for mind-blowing arrangements. Revolutionary levels of control are delivered through the built-in touch-sensitive X-PAD, rekordbox™ Quantize button and a twin LFO.

When it comes to connectivity, the DJM-900nexus raises the bar once more. Traktor™ certified, it unlocks DVS control directly through the mixer. Plus the DJM-900nexus joins the PRO DJ LINK family, offering unparalleled connection with the CDJ-2000 and CDJ-900 via a LAN connection – meaning the DJM-900nexus is ready for DJ booths the world over.

# DJM-900nexus CREATIVITY & CONTROL

*"The DJM-900nexus, with Quantize beat gridding from rekordbox™, adds a new dimension to the way you can use FX."*

James Zabiela

Precision engineered to bring studio-quality sound to the booth, the DJM-900nexus offers six stunning Sound Colour FX and beefed-up Beat FX to turn creative vision into reality. But the DJM-900nexus doesn't just add sensational new FX; it boasts an innovative control interface for instant activation and limitless creative expression.

### New Sound Colour FX

In addition to the essential FILTER and CRUSH, the DJM-900nexus boasts four new super-easy effects:

NOISE / SPACE / DUB ECHO / GATE/COMP

### Amazing Beat FX

Five new, insanely high-quality Beat FX bring the total to 14, and add an unprecedented level of control:

REVERB / SPIRAL / SLIP ROLL / MELODIC / MIDI LFO

### Instant Activation at your fingertips

QUANTIZE: Pick up rekordbox™ Beatgrid and BPM information from compatible CDJs, which can be connected via LAN cable thanks to PRO DJ LINK.

X-PAD: The touch-sensitive strip instantly engages Beat FX and adjusts things like loop sizes and sample length – all with one finger!

TWIN LFO: Bringing a new approach to FILTER, PHASE and FLANGER sweeps, LFO1 is controlled by the Beat buttons, while LFO2 expresses extra wobble factor using the X-PAD.

## DJM-900nexus BETTER CONNECTED

As the latest edition to the PRO DJ LINK family, the DJM-900nexus can be connected to compatible CDJ-2000 and CDJ-900 players via a LAN cable, to unlock revolutionary new features:

**CDJ ON AIR:** Turns the CDJ platter rim red to show audio is being output through the master channel.

**rekordbox™:** Links with Pioneer's music management software to pick up Beatgrid and BPM information.

**CUE LINK:** Preview music in the headphones, straight from rekordbox\*.

### TRAKTOR

Traktor™ users can easily connect to a PC with just one USB cable and control all of the features of the software with Timecode CD and/or vinyl.

The DJM's rear-connections are symmetrically and intuitively arranged so that DJs can easily connect to multiple sources "blind" – while the front-panel input selector makes switching between channel inputs effortless.

\* rekordbox™ is Pioneer's DJ software, which enables computer-based music management and set arrangement for playback on CDJs. For more information and latest versions, see [www.pioneer.com/rekordbox/support](http://www.pioneer.com/rekordbox/support)
