Frankfurt; Germany
Hall 8.0, booth G70

The new **OPERADIGITAL Series.**

Ten years after the first Opera Series, **dBTechnologies** presents a totally new generation with features never seen before.

Three different power classes, ranging from 200W-600W RMS, equipped with 8", 10", 12" or 15" loudspeakers, can be combined with our powerful active subwoofers, to be able to build highly flexible systems with a performance of up to 3200W RMS.

The new **Opera Digital** offers, thanks to latest technology, 33% more power at a reduced weight of 35%, compared to the predecessor.
