**Glowing Mirror Ball
with LED Motor**
Ref: 151.730UK

GENERAL SAFETY RECOMMENDATIONS:

- 1) Installation must be done by a qualified person and need to be installed in accordance with the European standard EN60598-2-7
- 2) Before installation check the unit is in good condition. If damaged do not plug the unit in to the mains. If the unit is not functioning correctly return to your retailer and do not attempt to repair yourself as there are no user serviceable parts inside.
- 3) Use indoors only
- 4) Install with a distance of at least 0.5m from flammable materials (decoration materials and others.
- 5) The installation must be done in such a way that it can support 10 times the weight of the mirror ball for at least 1 hour without showing any distortion.
- 6) The motor needs to be installed perfectly horizontally. Check the position with a spirit level.
- 7) Both the motor and the mirror ball must be installed out of reach of persons
- 8) Ensure all screw holes are used
- 9) Use a chain with sufficient strength for the installation of the mirror ball below the motor. Before connecting check each link of the chain to ensure there are no breakages
- 10) Connect the assembly to an earthed wall outlet.
- 11) Check the unit regally to ensure it has incurred no damage and is still in fully working order.

SPECIFICATIONS:
